

Rizwan — Lead
Rigging lead. Owns fan placement, mode switching, on-set judgment calls.

Crew 2 — Fan/Wind Op
Operates the fan: trigger, speed, angle, mode changes.

Crew 3 — Cable & Safety
Power, cable runs, sandbags, path safety.

Crew 4 — Props & Set
Paper stock, bench, actor-facing setup.

 **Owner** — responsible for getting it done

 **Support** — assists or is on standby

Blank — not involved in this task

Role labels are placeholders — swap in actual names/departments as confirmed.

BEFORE FILMING DAY				
TASK	RIZWAN (LEAD)	CREW 2 FAN/WIND OP	CREW 3 CABLE & SAFETY	CREW 4 PROPS & SET
Source fan/blower, variable speed Must run both a cued burst and a sustained continuous mode				
Confirm power draw, outlet type, cable length				
Prep sandbag stands				
Prep 10 × 10 in paper sheets (spares for retakes)				
Confirm bench has a back rail, correctly placed to block wind from behind				
Scout/confirm fan position — left of frame, 3–5 m off bench, never behind bench				
Confirm camera-to-bench distance Marked TBD on the diagram — part of this analysis				
Plan cable run path — taped/matted, clear of camera and crew paths				
Test rig outdoors against natural wind Both modes — burst and continuous				
Rehearse paper-lift burst — repeatability check, take to take				
Rehearse general wind mode — check hair/clothing/leaves read at medium–wide framing				
Confirm noise level against production sound				

FILMING DAY				
TASK	RIZWAN (LEAD)	CREW 2 FAN/WIND OP	CREW 3 CABLE & SAFETY	CREW 4 PROPS & SET
Set fan at confirmed position — camera-left, off-frame, never behind bench				
Sandbag and secure fan stand				

TASK	RIZWAN (LEAD)	CREW 2 FAN/WIND OP	CREW 3 CABLE & SAFETY	CREW 4 PROPS & SET
Lay, tape, and mat power cable run			O	
Frame check — confirm fan is never visible in camera frame	O	S		
Place paper on actor's lap each take				O
Trigger cued burst on "action" / cue (Mode A — paper lift)	S	O		
Switch to continuous general wind for medium–wide coverage (Mode B) Re-aim from upward-at-bench to level sweep across full frame	S	O		
Monitor hair/clothing/leaves movement in frame; call for speed or angle adjustment	O	S		
Watch crew and cable paths during takes — call safety hold if needed			O	
Reset paper and re-check cable/sandbag safety between takes			S	O
Final call on take (paper exited high corner cleanly / wind read correctly on wide)	O			
Wrap — cable pickup, strike fan and sandbags	S	S	O	S

Built from the Wind Rig diagram/deck (front view, top view, general wind, requirements). Role labels for Crew 2–4 are placeholders based on the natural split of duties in the diagram — swap in actual names once assigned. Some tasks may combine on a 4-person crew depending on call times and availability.
